Orders should be accompanied by Remittance for full value of Goods, or a letter of Credit on a London Bank, payable in Cash, against Shipping Documents. Where special arrangements have been made for Hypothecation of Documents, name of a Bank represented in England must be given, through which Bills of Lading, &c., can be passed and accounts collected.

Terms.—All prices quoted in this List are Nett and subject to alteration without notice. Owing to the constantly changing conditions, Orders can only be accepted on the understanding that prices ruling at time of receipt are charged. Customers may rely upon us to protect their interests and that all goods ordered will be invoiced at the lowest possible prices consistent with our high standard of Quality—the very finest. Packages and cases are charged extra, nett, at cost. Goods sent by Parcels Post are at Buyer's risk.

Shippers and Dealers are requested to write us. Special terms given.

Free Advice on Trade Difficulties.—Our services are at the disposal of our friends, and we shall be happy to advise should any trouble arise with the Drinks. If Samples of Goods complained of are sent to us at time of writing, matters will be much facilitated. Full and precise particulars as to method of manufacture should be supplied.

THE ADVANTAGES OF “ INDENTING ” YOUR ESSENCE ORDERS

Overseas aerated water manufacturers will find it an excellent practice to have their requirements of Essences and Colours shipped direct from England so as to be on hand at the opening of each Season when they are most wanted, and this ensures that all Essences used are in the most perfect condition.

A Golden Rule is to indent the Season's Order (allowing sufficient time for the goods to arrive from England before the new Season opens) and draw on the stocks of our regular Stockholders for whatever Essences, &c., makers run short of as the Season develops.

Indents can be sent to us direct to Manchester or through regular Stockholders, at customers' option: the latter is the better course in the case of makers whose total requirements (even for a Season) are not very large. Local Stockholders can often arrange for a number of small indents to be shipped together and so reduce proportionately the shipping expenses on each individual indent.
